

How to Use the AVerVision Flash Plug-in with SMART Notebook (Mac)

1. Install the AVerVision Flash Plug-in by double clicking the zip file, then double click the “AVerVision Flash Plug-in for Mac” MPKG file which is created
2. After installation, a Finder window will open to the Applications > AVerVision Flash Plug-in folder:

3. Double click the HTML file “FlashInterfaceSecuritySettings.html” (please note, if you do not have file extensions visible, look under the “Kind” column for the “HTML Document”).
4. Follow the steps listed to allow permissions for the Adobe Flash application to communicate with your document camera:

AVerVision Flash Interface Security Setting Help

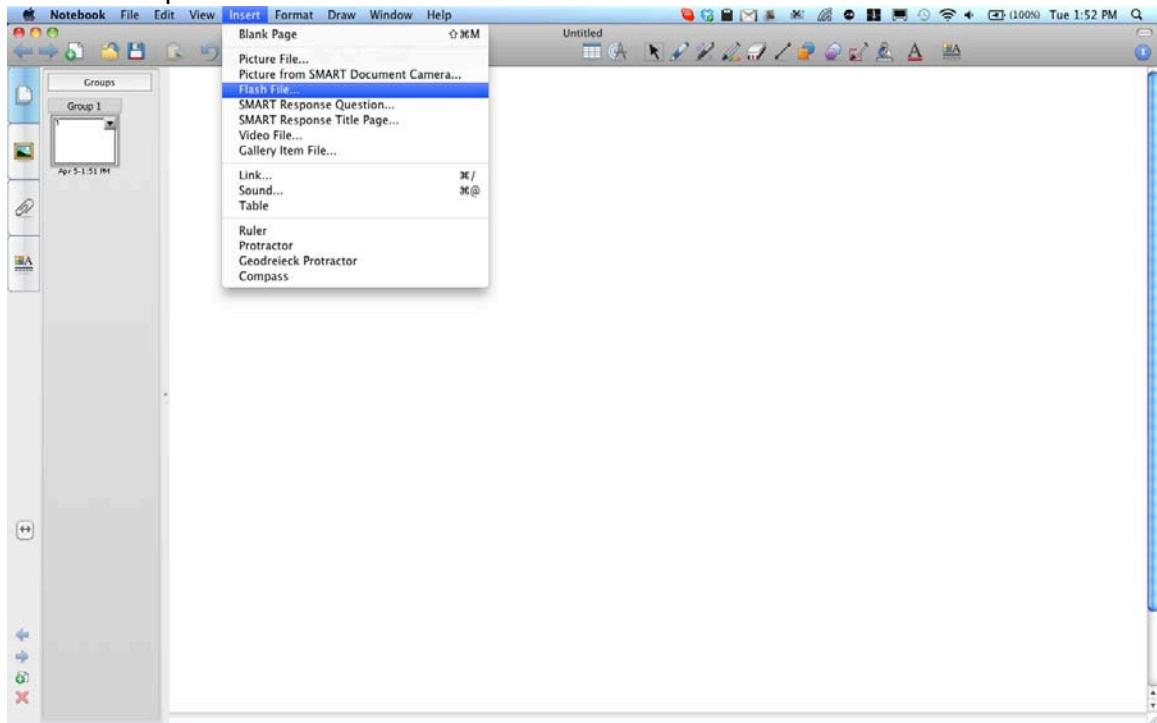

You have to grant access to AVerVision Flash Interface before using AVerVision Visualizer. If you are NOT seeing "Connecting..." or live image on the left side of the page, it means that the Flash Interface does not have permission to use AVerVision Visualizer yet. Please follow the instructions below to grant access.

1. Click the AVerVision Interface. If no response when clicking, right-click the Interface and choose **Settings...**
2. Click **Allow** radio button and make sure **Remember** check box is checked in Adobe Flash Player Settings dialog box.
3. Click **Close** button to close the dialog box.
4. The Flash Interface should show either "Connecting..." or live image now. If not, please contact support for assistance
5. Now you are ready to use the Flash Interface in 3rd party software.

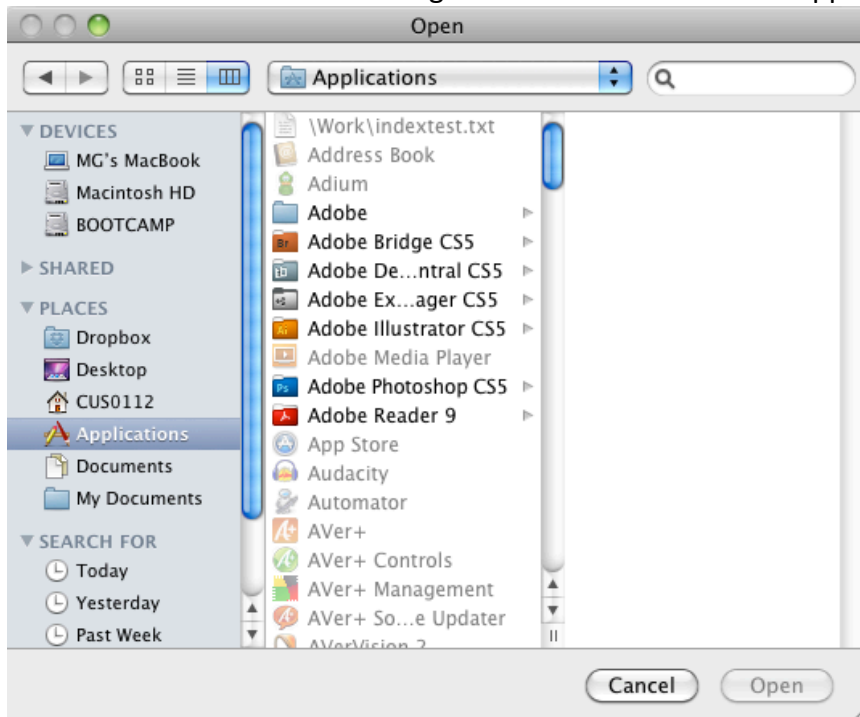

Copyright 1991-2010, AVerMedia All Rights Reserved.

5. Launch SMART Notebook software.

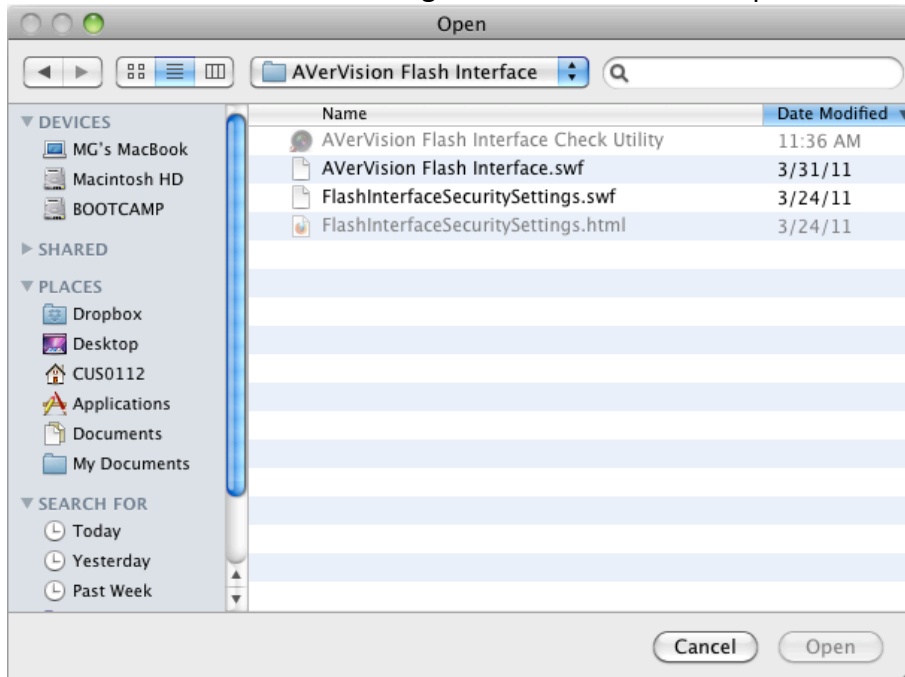

6. Go to the top menu and select Insert > Flash File...

7. Locate the "AVerVision Flash Plug-in" folder which is under "Applications"

8. Select the “AVerVision Flash Plug-in.swf” file and select Open.

9. Click Open

10. The Flash application will appear above the workspace:

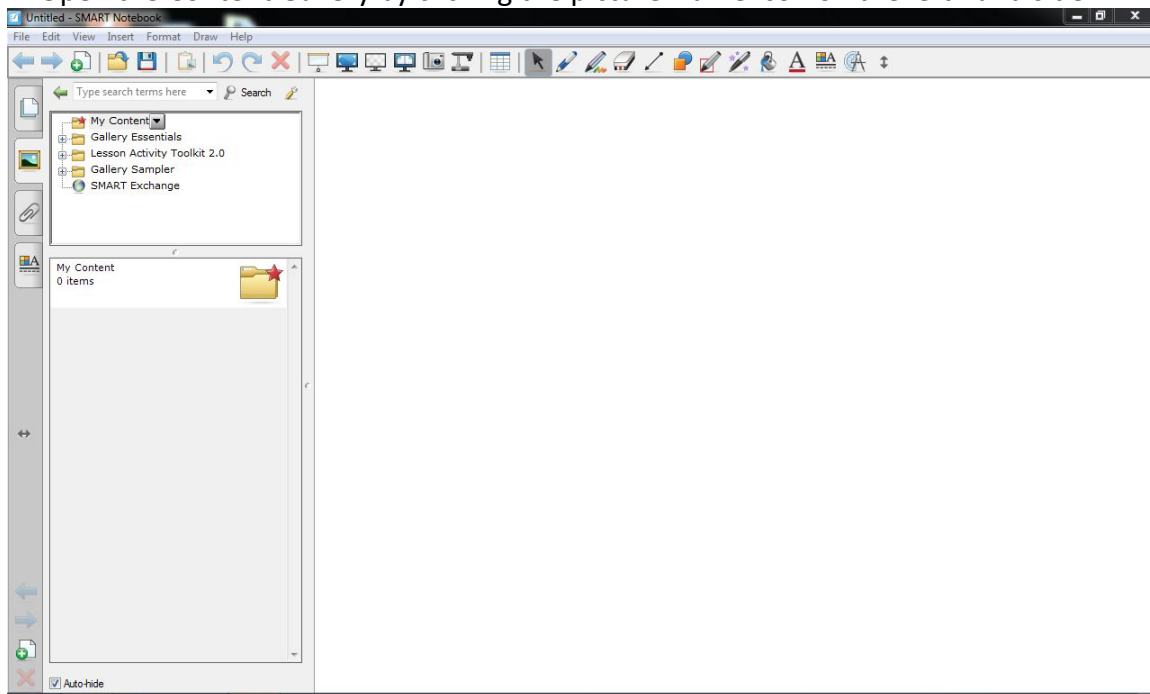

11. The controls in the lower portion (you must mouse over the portion for them to appear) of the application are for the following (where supported by your AVer document camera): Auto focus, zoom in/out, rotate, pause, mirror, brightness higher/lower.
12. You can resize the document camera video from the lower right corner as you would any other object

13. That's it! You can now annotate over the object and use it as you would any video object.

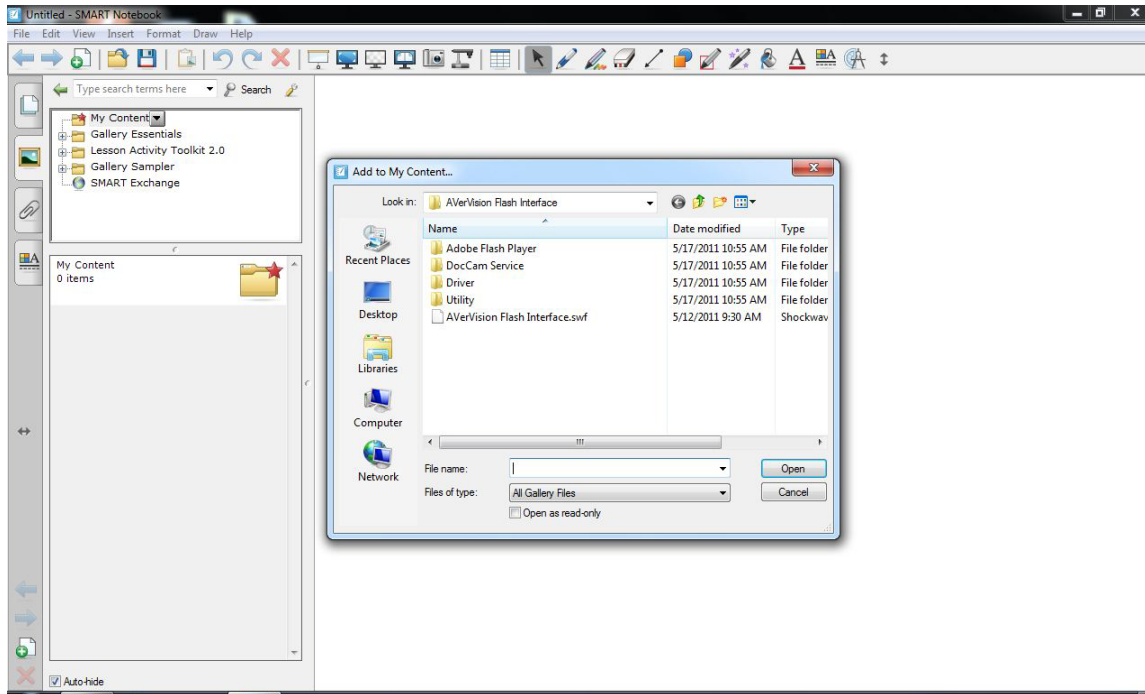

If you encounter any issues with the above steps, run the AVerVision Check Utility and confirm that the camera is properly connected and toggled to the PC mode. Both of these tools are available in the Applications folder under "AVerVision Flash Plug-in"

For faster access to the AVerVision Flash Plug-in you can create a shortcut from within SMART Notebook by following these steps:

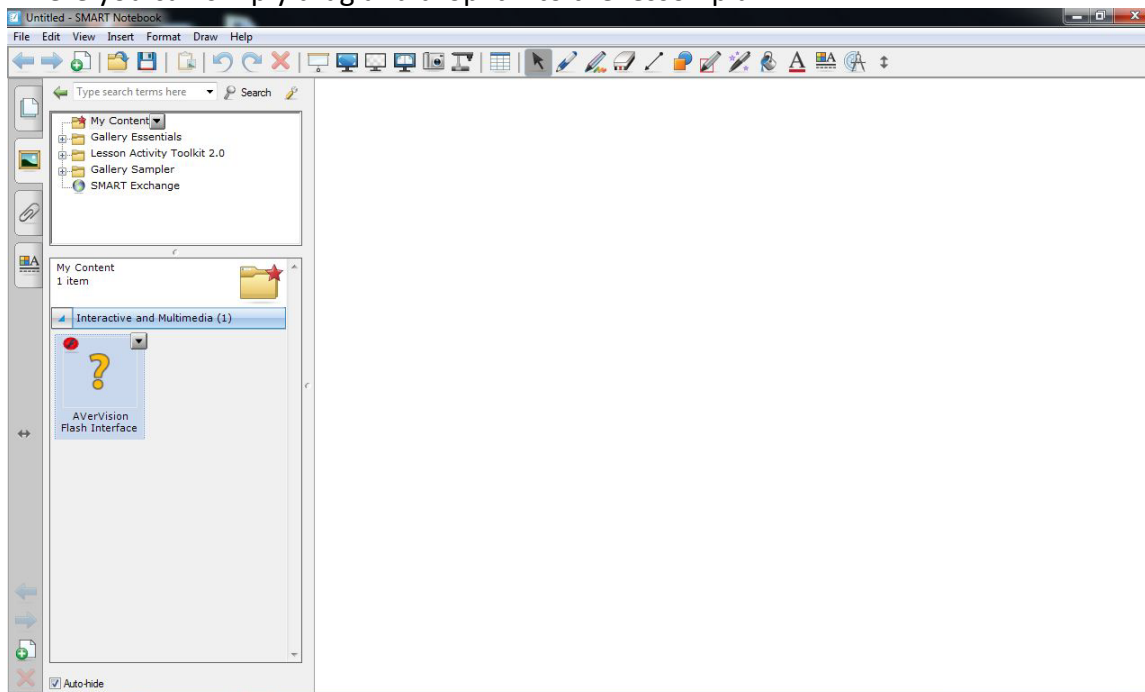

1. Open the Content Gallery by clicking the picture frame icon on the left hand side

2. Click the down arrow beside "My Content" and select "Add New Content"

3. Select the AVerVision Flash Plug-in flash file from your desktop shortcut
4. Now the AVerVision Flash Plug-in will be shown in the "My Content" folder of your gallery, where you can simply drag and drop it into the lesson plan.
